## Scam Messages

Occasionally on WhatsApp, people receive spam messages from unauthorised third parties or from fraudsters pretending to offer prizes to 'lucky people' encouraging recipients to click on a link to win a prize. A common scam involves messages warning recipients that their WhatsApp subscription has run out with the hope that people are duped into providing their payment details. Other scam messages include instructions to forward the message in return for a reward or gift from WhatsApp or another person.

## The 'Only Admin' Feature and Cyberbullying

Cyberbullying is the act of sending threatening or taunting text messages, voice messages, pictures and videos, with the aim to hurt and humiliate the receiver. The group chat and group video call features are great for multiple people to chat simultaneously, but there is the potential for people to hurt others with their comments or jokes. The 'only admin' feature gives the admin of a group chat greater control over who can send messages. Whilst this can be good for one-way announcements, the group admin has the power to block somebody from responding to an offensive message in a chat, which could result in a child being upset and unable to reply.

## Connecting with Strangers

To start a chat in WhatsApp, you need to know the mobile number of the contact you want to speak to and they also need to have the app downloaded. WhatsApp can find contacts by accessing the address book of a device and recognising which of those contacts are using WhatsApp. If your child has shared their mobile number with somebody they don't know, they can use it to get in touch via WhatsApp.

## Live Location Sharing

WhatsApp's 'Live Location' feature enables users to share their current location in real time to their contacts in a chat, allowing friends to show their movements. The feature, which can be found by pressing the 'attach' button, is described by WhatsApp as a "simple and secure way to let people know where you are."

Location-sharing is already a common feature on other social apps, including Snapchat's Snap Map and Facebook Messenger and can be a useful way for a child to let loved ones know they are safe. However, if your child is in a group chat with people they do not know, they will be exposing their location.
